

— MB Slab[®] System for Contractors

An opportunity for growth and increased profit. The increasing need of extended joint spacing for slab-on-ground construction offers great opportunities for contractors. The MB Slab System can help you gain new project opportunities and differentiate yourself from the competition as a market innovator. From distribution centers to large manufacturing and warehousing operations, there's a wealth of opportunities for expanding your revenue potential.

Work faster, improve profitability. With the MB Slab System, contraction joints are spaced much farther apart, or in some cases, eliminated altogether. This means less time on the job, fewer joints to cut, and reduced exposure to silica dust for your work crew.

Benefits for you.

- New bid opportunities
- Faster slab construction
- Reduced saw-cut joints
- Installation cost savings
- Improved jobsite safety
- Excellent finishability
- Differentiation from competition

Benefits for your customers.

- Design and usage flexibility
- Enhanced aesthetics
- Reduced environmental footprint
- Long term durability
- Lower maintenance costs
- Increased service life
- Reduced liability

Master Builders Solutions offers support throughout the process.

- Largest service network of experienced professionals offering local customer service and support
- Intelligent e-Tool helps dial in the correct admixture dosage
- The Master Builders Solutions brand you trust
