

MB Slab[®] System

for Producers

The path forward to increased growth and profitability. If you're looking for added revenue, consider adding the MB Slab System to your arsenal. As a superior extended joint spacing solution for large slab-on-ground construction projects, the MB Slab System offers enhanced value to premium-priced projects—ranging from big box retail and new distribution centers to large manufacturing and warehousing operations. The MB Slab System can help gain new business and enhance your reputation as an expert in durable concrete solutions.

A partnership approach. You strive to add value to every construction project coming in your door. Master Builders Solutions brings added slab-on-ground knowledge and mixture design expertise, contributing to higher profit margins, increased quality and innovation leadership.

The MB Slab System offers many significant benefits.

- Fewer joints, faster construction
- Lower installation costs and improved job site safety
- New bid opportunities
- Excellent finishability and improved aesthetics
- Lower maintenance costs, reduced liability
- Enhanced slab durability and service life

Master Builders Solutions offers support throughout the process.

- Largest service network of experienced professionals offering local customer service and support
- Intelligent e-Tool helps dial in the correct admixture dosages
- Ask us about upgrading to the MasterTrac Plus Network—the future of smart dispensing and digital inventory management
